

Maxum Financial Products

New Professional Liability Policy for Architects & Engineers Now Available

Maxum Financial Products is pleased to announce the release of its new Professional Liability Policy for Architects & Engineers (A&E). This new policy incorporates many market-leading terms directly into the base form as well as provides extensions of coverage for Contractors Pollution Liability, Network Security and Privacy Liability, Technology Based Services Liability, and Media Liability. We are also introducing a new set of General Terms & Conditions that will serve as the basis for future professional liability forms. This policy represents Maxum's ongoing commitment to providing competitive professional liability products to our wholesale partners.

Our appetite is focused on the following A&E risks:

- Architects
- Design/Build Firms
- Electrical Engineers
- Mechanical Engineers
- Land Surveyors
- Landscape Architects
- Civil Engineers
- Forensic Engineers
- Structural Engineers
- Process Engineers
- Customized Machinery
- Construction Managers (including At-Risk)

We are interested in Architects & Engineers risks which:

- are considered hard to place due to specialization
- have a claim history of frequency or severity, or both
- are seeking practice- or project-specific excess coverage

We have the ability to write up to a \$5 million aggregate limit on a primary or excess basis. We look for accounts with a minimum of \$100K annual revenue and we require a minimum premium of \$5,000.

Please find an attached copy of the A&E form and new General Terms & Conditions, now available in all 50 states and the District of Columbia on a non-admitted basis through Maxum Indemnity Company.

Additionally, Maxum offers risk management services and contract review at no cost to architects & engineers liability policyholders through OmniSure Consulting Group, risk management specialists for construction and design professionals. Together, Maxum and OmniSure are with our A&E clients every step of the way!
